MICROSOFT COPILOT KEYWORDS

I am a pilot, please review and analyze the below job announcement and provide 8 keywords and core capabilities for my federal resume. The position is responsible for planning, organizing, and controlling multiple, varying, complex assignments necessary to meet the outcomes and mission of the AVS Organization Designation Authorization (ODA) Office. Special projects and teams are established in the ODA Office to focus on overseeing the ODA Program across AVS and operationalizing of the ODA Office. Work involves interaction with FAA employees and contract support staff and requires interaction with multiple stakeholders internally across AVS as well as externally with industry. Serves as a Program Manager in the AVS ODA office who plays a key role in evaluating overall ODA program performance (ODA holder and FAA oversight organization) and in the resolution of disputes that could be wide ranging in nature. 1. Ability to apply Title 14 Code of Federal Regulations (CFR) and related guidance with quality systems as it relates to the production and/or maintenance, or operations or airworthiness of aircraft, aircraft articles, and airworthiness. 2. Knowledge of risk analysis techniques used to analyze and evaluate the safety impact of products and parts. 3. Ability to establish and maintain effective working relationships with multidisciplinary subject matter experts, and in facilitating organizational consensus by explaining, advocating, and negotiating with individuals and groups internally and externally to resolve complex problems and achieve a common understanding of issues. 4. Ability to lead a team, coordinate work, plan, and evaluate multiple technical and administrative activities concurrently towards the successful accomplishment of task, goal, or project. . Ability to explain, advocate, and negotiate with individuals and groups internally and externally to resolve complex problems
